Creating a Product in PIQO Portal

Version 1.0.0.0

01/03/2018

After logging into the portal, select "Products" section from "Developers'" menu. Then click on "Create a new Product". Fill the fields in the form as follows:

- **نام**

    Define a custom name for your application.

- **شناسه**

    This should be a Nickname for your product, starting with "PRD". It is preferred that this name be in all caps.

- AppID

    This value should be acquired from the Identity team.

    You can click on this link to view the process and this link to find out about requirements.

- **توضیحات**

    Briefly describe your application.

- کلید RSA

    Place your public key in this field. You can use "امضای دیجیتال" section available in this link as a guide.

- **آدرس بازگشتی**

    You can leave this field blank.
